Students of Zilla Parishad School, Khandala, recently visited a flower farm and Shetkari Mala as part of an educational visit. The visit provided students with a valuable opportunity to learn beyond the traditional classroom.

During the visit, the students closely observed flower cultivation and various farming practices. They learned about flower cultivation and nurturing, plant care, farm maintenance, and the importance of proper farm management. The visit also helped students understand the hard work and dedication involved in farming.

This practical experience enabled the students to connect classroom learning with real-life situations. They were encouraged to ask questions, observe nature closely, and develop greater curiosity about agriculture and the environment.

The accompanying teachers explained various agricultural practices and highlighted the important role of farmers in society. The students enthusiastically participated in the activities and gained valuable knowledge about agriculture, nature, and sustainable farming practices.

The educational visit proved to be an enriching and memorable experience for the students. Such experiential learning activities help children develop practical understanding, curiosity, observation skills, and respect for agriculture and nature.

***The visit concluded with the students returning with new knowledge, joyful memories, and a deeper appreciation for farming and the natural world.***
